# Hydrotherapy tubs made possible by the BurnAid Golf Classic

Working Together to Benefit the Regions Hospital Burn Center

**BurnAid Committee members attended the dedication of the hydrotherapy tub rooms at Regions Hospital Burn Center. The sign on the left credits the tub room renovation to the BurnAid.**

The Burn Center at Regions Hospital held a ribbon cutting ceremony on Wednesday, February 25, to celebrate the completed renovation of two of their hydrotherapy tub rooms. The hydrotherapy tubs are used to clean wounds and burns. Hydraulic lifts allow different areas of the body to be washed at different times so that bacteria do not wash over open wounds and cause infection. “The rooms are now more versatile and efficient,” said William Mohr, M.D., director of the Burn Center. “This makes things easier on the caregivers and really makes the rooms more patient-friendly.”

The renovation of the hydrotherapy tubs was made possible by the annual BurnAid Golf Classic hosted by the National Fire Sprinkler Association and the Regions Hospital Foundation. The golf tournament has raised over \$580,000 for the Burn Center and funded the entire renovation project.

The National Fire Sprinkler Association, Minnesota Chapter is dedicated to educating and informing the Minnesota public of the vital role sprinkler systems play in fire protection and are committed to preventing burn injuries. The Burn Center, Regions Hospital Foundation and the National Fire Sprinkler Association work closely to determine how the money can be spent to benefit burn survivors and their families.

## ***Your sponsorship and gifts support the Regions Hospital Burn Center***

*The BurnAid Golf Classic has been established to fund programs and services to benefit burn injured children and their family members.*

*Gifts through this tournament enable the Burn Center to offer unique and far-reaching programs to benefit children and their families.*

Past proceeds have helped fund various Burn Center programs:

- **Site Right Ultrasound machine**  
This ultrasound machine makes it much less painful for burn victims to be outfitted with IV's and injections through burn injured skin. It is especially valuable in treating small children.
- **Burn Survivor Support Representative**  
Chris Gilyard, 2001 BurnAid speaker, works with patients offering lifelong support in living with burn injuries.
- **Interactive Face Mask Display**  
This display of masks and apparatus used to ease burn scarring is used by fire departments and schools in burn injury education.
- **Cooltheburn.com website**  
People worldwide can ask questions and seek help with burn injuries on this site.
- **School Re-entry Program**  
Burn Center staff visits classrooms of children returning to school after a burn injury. The nurse tells the children of the burn treatment and passes around samples of what they may see their friend wearing to treat the burn.
- **Burn Hydrotherapy Tanks**
- **Children's Burn Camp**
- **Family Burn Camp**

## ***Thank you for your support!***
